Consumer Price Index ◆ August 2010

Consumer Price Index (2002=100)

Highlights

- British Columbia's Consumer Price Index (CPI) rose 1.5% from August 2009, after a 2.0% increase in July. Consumer prices rose in all provinces compared to last year. Ontario continued to record the highest annual inflation in the country, at 2.9%. Nationally, consumer prices increased 1.7% from a year ago.

- Among the metropolitan areas, Toronto (+3.1%) had the highest year-over-year increase in consumer prices, followed by Ottawa at 2.9%. Winnipeg (-0.3%), experienced the lowest increase in consumer prices. Inflation remained strong in Victoria (+1.2%) and Vancouver (+1.8%) compared to last year as the continuing effects of the HST will take a year to be built into the base year of the calculation.

- BC's overall energy prices went up 8.5% between August 2009 and August 2010, as fuel oil & other fuel (+21.3%) and electricity (+8.8%) surpassed piped gas (+2.1%). Other significant increases were seen in reading material & other printed matter (+10.2%) and gasoline (+6.5%). Food prices rose 1.9% as a result of the price of restaurant meals increasing 6.7%. Consumers paid more for cigarettes (+6.5%), and local public transport (+5.5%) but saved on clothing (-6.7%), especially for children (-12.2%).

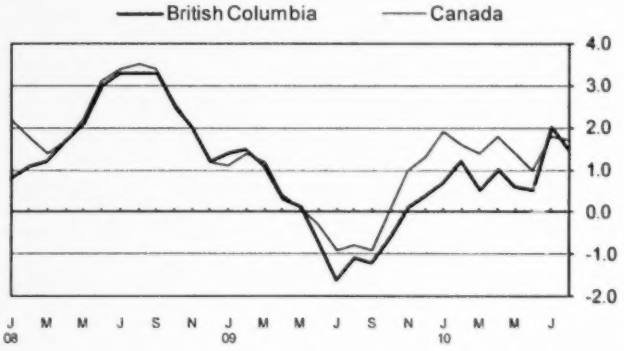
- BC's All-Items CPI excluding energy was up 1.1% from August 2009, while the index increased 1.4% for Canada as a whole.

Note: Statistics Canada will release the August Consumer Price Index on October 22, 2010.

2002=100	All-Items Index	% Change from	
	August 2010	July 2010	August 2009
Canada	116.7	-0.1	1.7
BC	114.5	-0.1	1.5
Vancouver	115.7	0.0	1.8
Victoria	113.6	-0.1	1.2
Core Canada[1]	115.6	0.1	1.6

BC and Canada Inflation Trend

(% change, same month of previous year)



2002=100	Latest 12-month Average Index (ending in August 2010)	Latest 12-month Average % Change	2009 Annual Average % Change
Canada	115.6	1.2	0.3
BC	113.0	0.6	0.0
Vancouver	113.9	0.9	0.1
Victoria	112.4	0.3	0.1

[1]**The Core CPI for Canada:** Defined by the Bank of Canada as the All-items index excluding the eight most volatile components (fruit, vegetables, gasoline, fuel oil, natural gas, mortgage interest, inter-city transportation and tobacco products). Also excluded is the effect of changes in indirect taxes on the remaining components.

Consumer Price Index—Terms and Definitions

Base Effect

The 12-month variation in the CPI is calculated by comparing the current month's index with the index for the same month of the previous year. The 12-month change is represented by the difference in the indexes of the reference months. Thus, the 12-month variation can decrease from one month to the next merely because the base serving as the point of comparison increased.

Source: Statistics Canada

Twelve-Month Percent Changes

Also referred to as "year-over-year", twelve-month percent changes compare indexes for a given month to indexes for the same month of the previous year. As they compare two points in time, they are influenced by unusual or temporary events that can affect either of the two months. Their calculation does not include any of the intervening monthly indexes.

Source: Statistics Canada

Annual Average Index

Annual average indexes are calculated by averaging index levels over the 12 months of the calendar year. These data should not be confused with the 12-month change in the CPI. By the nature of the calculation, averaging indexes over the calendar year gives a better representation of price behaviour over the whole year and is closer to the concept of an average price. The use of annual averages is considered the preferred option for indexation purposes.

Source: Statistics Canada

Latest Twelve-Month Average Index

The latest twelve-month average index (ending in the current month) is a 12-month moving average of the indexes of the most recent 12 months. It is calculated like the annual average index. Hence, in theory, the December twelve-month average index would be equal to the annual average index for the calendar year. However, in practice, when BC Stats makes these calculations from published data, the December 12-month average index may differ from Statistics Canada's published annual average index due to rounding.

Source: Statistics Canada

Harmonized Sales Tax

On July 1, 2010, the Harmonized Sales Tax (HST) came into effect in British Columbia and Ontario. As well, Nova Scotia increased its HST by two percentage points.
